FERGUSON'S SEED GUMPTION

FOR THE SOUTHWEST

Issued Monthly by **Ferguson Seed Farms**, to give timely information on **Field, Garden and Flower Seeds**, Suitable for planting in the Southwest. Sent free to our customers regularly, and to others on request.

Price Effective **January 5, 1919.**

Sherman, Texas.

Vol. 1. No. 2.

A Stringless Guarantee

Of Satisfactory Seeds or Money Back

Just as given in our regular catalog, is a condition of every sale. **You are made judge and jury of your own satisfaction.** We allow you to keep the seeds ten days after arrival at your station for examination and test. If you decide that the seeds are not satisfactory you to return to us and we refund your money and pay freight both ways, without "ifs" or "ands" or questions asked. Have been in the seed business 16 years on this guarantee. This is as fair and liberal as we know how to be.

The Prices named herein are our prices on this date. Prices on all seeds and field seeds in particular, are subject to change. Open orders will be filled at the ruling prices on date order is received and filled. If prices decline our customers get the benefit. If they advance, we advance the prices.

Our Terms are Cash With Order. Persons or firms should remit to cover their order or name three or more business references and allow time for inquiry before shipment is made. Charge orders of less than \$10.00 are subject to an additional 10 per cent to cover bookkeeping costs.

FIELD SEEDS are quoted f. o. b. our stations, Sherman or Howe, Texas. Sacks and truckage free unless otherwise stated.

GARDEN AND FLOWER SEEDS are quoted postage or express paid to your station. If you want seeds shipped with transportation collect to be paid by you at your station, deduct 5c per pound from post paid prices.

SEED CORN FOR 1919.

There is a great abundance of seed corn this year. There always is **IF you are not particular about the quality.** Most of it can be had for about half the amount we ask for our seed corn.

Differences in prices are the least significant facts to consider in buying seed corn. Already we have shipped a good part of our available supply of seed corn to old customers at \$5.00 to \$7.50 a bushel. Why do you suppose that they continue to pay us such prices for our **Certified, Pedigreed Seed Corn** when everyone knows that we will gladly tell them where to buy sound, heavy seed corn with good germination at almost half the money if requested to do so?

The answer is simple. **THEY WANT TO RAISE A CROP OF CORN.** These old customers have found out by actual experience two facts:

1. That ordinary seed corn will cost them (even though it comes out of their own cribs) 30c to 60c an acre, and that our Certified, Pedigreed seed cost only 50c to 90c an acre—or only 20c to 40c more.
2. That our strictly native pedigreed seed regularly yields 5 to 30 bushels per acre more than common seed corn.

Our 1919 Spring Catalog

DID YOU GET YOURS?

Bigger, Better, More and Larger Pages. More Illustrations, More Information, and Altogether More Interesting and Instructive Than Ever; 74 Pages With a Cover Picture in Colors Pretty Enough to Frame. Gives Information about **Field and Garden Crops**; also **Flowers** for the Southwest.

Whistle, Write, 'Phone, Telegraph or Make a Sign

— **It's All Yours For The Asking.** —

ADDRESS ABOVE

To Convince You, it may take a look through our 1919 CATALOG with its instructive photographs, diagrams, explanations of breeding methods, testimonials, and the like, but not these old customers. Many of them have ordered and received their seed corn before our catalog was on the press. Many of them have learned that the supply of our special seed corn of **CHISHOLM, SURCROPPER and FERGUSON YELLOW DENT** is limited to what we can produce ourselves. They have had money sent back and told to wait twelve months even when they wanted our seed corn right then. Hence their early orders now.

SEED OATS.

Early planted Texas Red Rust Proof oats have generally been the best paying grain crop in many sections of the Southwest for three seasons back. In North Texas, Oklahoma, Arkansas, and further North the purer and better strains of the **genuine red oats** are attracting attention. High priced feed stuff is forcing such attention to good quality in seed oats, such as was never given before. Out of over a hundred reports received last summer from customers who planted our pure strain of genuine red oats **FERGUSON NO. 71 OAT** better than 97 per cent reported better yields, better quality of grain and less smut and rust. This is a pretty good record of "Satisfactory seeds." This makes us believe that our seed breeding work is practical even if it is also scientific.

SPRING WHEAT.

Hard Spring Wheat is here to stay. Modern milling methods calls for some hard wheat to give "rising quality" to soft wheat flour. For the last two years a usual yield of 20 to 40 bushels per acre of hard spring wheat "seems to look good" to wheat farmers—along with the government guaranteed price.

COTTON SEED.

This is the Biggest Crop in the Southwest and its the most important specialty of Ferguson Seed Farms. Of course, we have the highest yielding, high bred strains of "**MEBANE TRIUMPH.**" "Hold a minute!" did you say. "That is a strong claim." Yes it is but read this record: **Four Government tests in four years, by four different investigations in three Southwestern states put our seed ahead by 188½ pounds of seed cotton per acre. Our new catalog describes a new strain FERGUSON'S TRIUMPH NO. 406,** that is better still. It is the best yielding, best linting and most rapid fruiting Triumph cotton of all, according to tests in our trial grounds. **NEW BOYKIN**, named for the grandfather of Triumph, is the best money making cotton for the Southwest, according to the reports of many farmers who are growing our New Boykin and to the recent tests of the Arkansas Experiment Station. It excels as a bottom land cotton and as an upland cotton. It is an unusually early and rapid fruiting variety. It yields more seed cotton to the acre, makes a better turn out of lint at the gin and has a larger boll and is more storm proof than any other good variety in the Southwest—and it will "make more dollars per acre."

LONE STAR cotton, a large boll extra staple variety, has long been one of our specialties. We have been breeding LONE STAR cotton for nearly a decade. Its good yielding quality in the fields, high per cent of lint "turn outs" at the gins, extra length, strength and drag of the staple, together with its large storm proof bolls has caused it to rapidly become one of the leading varieties of cotton in

the Southwest. It is a favorite with the cotton buyers and usually brings the top of the market and often an interesting premium over the other varieties.

All these varieties and **FERGUSON ROUNDNOSE** cotton are fully described in our **1919 NEW CATALOG**.

Seed Corn.

Ours is the only bonafide seed breeding seed farm in the entire Southwest producing genuine certified pedigreed seed corn,

developed by ear-to-row methods. Many government tests prove that such corn yields more than even the most carefully selected seed of the same varieties. We offer seed of The Three best-yielding varieties for the Southwest. All originated and continually bred-up, by us, from year to year. Seed corn on ear, extra selected ears, \$10.00 per bushel. Our seal and certificate of good breeding is put on every bag of pedigreed seeds.

CERTIFIED PEDIGREED SEED CORN.

Cotton Seed.

Our cotton seed are grown under our supervision from freshly bred-up pedigreed strains of our own seed, developed in breeding blocks on our own farms and ginned in our own gins (Seals and certificate to this effect on every 4 bu. bag.) We sell our own seed. No others. Special prices on large orders.

Certified Pedigreed Seeds	1 to 24 bu.	28-52 bu.	56-100 bu

Ferguson Triumph No. 406	5.00	One bushel only to a customer.	
New Boykin	5.00	4.75	4.75

Seed Oats.

We offer only **FERGUSON NO. 71 OATS** for it has long since proven that it yields better than common country run thresher run red oats. The advantage in yield and quality is so much greater, and the difference in price of seed per acre, so small, (if any practically) that we do not offer the common unimproved Texas Red Oats.—

PRICES, in bag lots, 5 bu. to bag; Certified Pedigreed Seed 1 to 50 bu. \$1.50 per bu; 55 to 100 bu. \$1.45 per bu; 104 bu. and up \$1.40 per bu.

SPRING WHEAT

We have re-cleaned hard spring wheat, in nice shape for seeding, \$3.00 per bu. in sack lots, 2½ bu. per bag.

COW PEAS

See February price list. If you have peas for sale send sample, state quantity you have for sale and price wanted.

Stock Beets.

We urge everyone to plant some stock beets for poultry, dairy cows and hogs. Plant five pounds per acre.

Mammoth Long Red	\$1.10	\$10.50	50.00	\$90.00
Golden Tankard	1.10	10.50	50.00	90.00
White French	1.10	10.50	50.00	90.00
Giant Half Sugar	1.10	10.50	50.00	90.00

Sudan Grass

This is the greatest hay grass, and pasture grass known. It is an annual and must be seeded every year. Never becomes a pest. Yields 2 to 10 tons per acre. Plant at late corn planting time, and any time on up to July, on stubble land. Early plantings are best. First cutting usually about 60 days after sowing and thereafter every 45 to 60 days until frost. We specialize on Sudan Grass and offer re-cleaned seed of the following grades, all seed certified by growers affidavit that it is free from Johnson Grass.

GARDEN SEEDS

Proven Good Varieties For The Southwest

IN THIS ADVANCE LIST OF GARDEN SEEDS WE OFFER ONLY SELECTED, STANDARD VARIETIES AT POSTPAID PRICES

All varieties in this list are not only varieties that have been **TESTED** and **PROVEN** to be **GOOD** for the Southwest, but the seeds have been tested for germination. All seeds must show a strong germination or no sale. See **Our Stringless Guarantee** mentioned on first page. All vegetable seeds quoted in this list in Packets, ½ Ounce, Ounce, ¼ Pound, ½ Pound, Pounds, and 2 Pounds are delivered **FREE TO YOUR DOOR** by Parcel Post or Express; no charges whatever for packing or transportation.

If for any reason your seeds fail to reach you within a reasonable length of time, write us and we will refill your order.

HOW TO SEND MONEY. Money order, draft or check is the safest and surest. Next best is paper money and a registered letter. We accept postage stamps the same as cash. Do not send silver unless it is well wrapped when enclosed in the envelope.
